

Frequently Asked Questions

Q. How long does the fingerprinting process take?
Electronic fingerprints usually take less than 15 minutes.

Q. Can I make an appointment or just walk in?
No appointment is needed but if you make one and arrive within five minutes of your appointment, you'll go to the front of the line. Walk-ins are always welcome during our normal business hours Monday through Friday and some Saturdays. Walk-ins will be scanned on a first-come, first-served basis. For groups, we prefer you call for an appointment to avoid a potentially long wait time.

Q. When will the results be received by the requesting agency?
We'll transmit your fingerprint data and supporting information within 24 hours. If no problems with the data are experienced, the requesting agency should receive your information within 48 hours.

Q. Do people share common fingerprints or do fingerprints change over time?
Fingerprints are unique to each individual; even identical twins have different prints. Fingerprinting provides the most accurate and cost-effective means of positive identification. Due to aging, fingerprints can become more shallow or show scars from cuts; that's why fingerprint data have a "digital life span."

Q. Will my information be treated confidentially?
Yes! We use a private, secure Internet connection to transmit your fingerprints to the Illinois State Police so your data cannot be intercepted by outsiders.
